## Agreement for Midwifery Services

You have been given choices for your midwifery care and as I accept clients for care, I will honor your decisions to the best of my ability within the bounds of safety for you, your baby and family. As a professional midwife, I attend women having normal, natural, unmedicated labors and births, to babies who are expected to be normal.

I cannot guarantee that your birth experience will take place outside of the hospital; in the event of an emergency, or your condition ventures outside of normal limits, you will be referred or transferred to a higher level of medical care. Any expenses incurred through referral/transerral will be the client's responsibility. Also any laboratory, ultrasound or other studies would be the client's responsibility. If you have been under the care of other providers we may request copies of your case file and labs, with your signed consent.

Fees for services, supplies and reserving on-call time for your labor are nonrefundable. Agreed upon fees may be paid as services are rendered until week 36, when all final fees are due. Insurance is not an acceptable form of payment at this time, but a detailed receipt for all services can be issued, upon request, for submission to your insurance company at the conclusion of all services.

Fees for chosen birth service plan is: \$\_\_\_\_\_

All fees are expected to be paid in full by wk 36 of your pregnancy/date: \_\_\_\_\_
